

Week 7 Working from home Menu - Notes 18.5.20

Hello Class 1,

Maths – This week we will move on to using ‘arrays’ which are multiplication pictures in our ‘using numbers’ task. Complete the worksheets. (again, if you don’t have a printer don’t worry! Just write the calculations in your home schoolbook).

Use ‘Timestable Rockstars’ website to practice your times tables with speed!

Volume and Capacity – This week we are going to move on to using a scale to accurately measure liquid in a container. This means the lines and numbers you find on a measuring jug. Then complete the worksheets.

Please remember to complete the **daily mental maths** short sessions as these are really important for maths and number confidence.

English

Watch [‘You Tube’ video of ‘Annie’s workshop – audio books for children’ reading - ‘The Enormous Turnip’](#).

You might even have your own version of this story book at home to read?

Write your own story about an amazing plant. A giant vegetable? A tiny tree? A magic seed? A never ending flower? Don’t forget to draw your illustrations too!

Science – Amazing plants

Go to BBC Bitesize website and look for Key Stage 2 Science Plants.

Go straight to the class clips this week. Watch these videos -

1. Bromeliad in the rainforest.
2. How cacti survive without water.
3. Plants (clip compilation)
4. Variations in plants.

Read the ‘10 Fun Facts about Plants’ – choose your favourite 5 (or more) write and draw them in your home school book. If you want to find out even more fun facts this website is where I got my facts from funfactabout.net/plants-facts/

Don’t forget to check on your seeds - How are they doing? Have any started to grow yet? Here are a few photographs of what is happening in my garden -

Art/Science – Making Rainbows

Look at the instructions sheet attached. I had a go at this today – it was great fun! Don't worry if you don't have all the rainbow colours – I didn't ... but it still worked well. And don't worry about the 'words to learn' scientific words (KS2 words) the activity is fun!

French – This week have a go at learning the days of the week in French. Revise all your work and words that you have already done this term. How many words and phrases can you remember?

Next week (starting on Monday 25th May) is half term so there won't be a new weekly work menu until Monday 1st June. However, Mr Goldspink has been in touch and is missing all of you so he has sent you a letter and some half term challenges that you may like to try out over half term!

Keeping in touch

Please remember you can send me pictures of your lovely work on our Class 1 email. Please make sure that it is the Class 1 email otherwise it may not reach me.

class1info@cropwellbishop.notts.sch.uk

I hope you have fun with these activities this week. Stay safe and keep well.

Mrs Bulmer
