germinate

roots

Key vocabulary

Seeds		A seed is the part of a seed plant which can grow into a new plant. There are many different kinds of seeds.
Bulb		A bulb is the part of some plants, mostly under the soil, that stores food while the plant is resting from growing. Some well known bulbs grow into food like onions and garlic.
Germination		When the conditions are right, the seed soaks up water and swells. The tiny new plant bursts out of its shell.
Observation		Closely observing (watching/ monitoring and taking notice .
Comparison		Looking at similarities and differences.
Hypothesis		A hypothesis is a guess based on information you already know
