

Year 2 Living Things and Their Habitats KNOWLEDGE ORGANISER

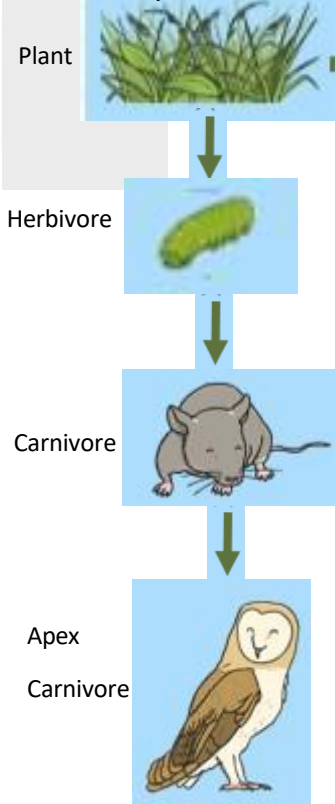

What do living things need to survive?

Examples of **habitats**:

Example food chain

Examples of **microhabitats**:

Key vocabulary

life processes		These are the things that all living things do. They move, breathe, sense, grow, make babies, get rid of waste and get their energy from food.
living		Things that are living have all the life processes .
dead		Things that are dead were once living . They did have all the life processes but don't now.
never living		Things made out of metal, plastic or rock were never living . They never had the life processes .
habitat		A habitat is the natural place something lives. A habitat provides living things with everything they need to survive such as food, shelter and water.
microhabitat		A microhabitat is a very small habitat in places like under a rock, under leaves or on a branch. Minibeasts live in microhabitats .
food chain		A food chain shows how each animal gets its food.
food sources		This is the place a living thing's food comes from. This links back to their habitat.
